Tips:

1. Make sure your computer is well-connected with the Internet.

2. We suggest you should copy & paste the registration information into the popup dialog.

3. Make sure both the Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click "**Buy Now**" to get a license.

4. Please make sure the Registration Email and Registration key you entered are both complete and correct, otherwise an error message will pop up as below:
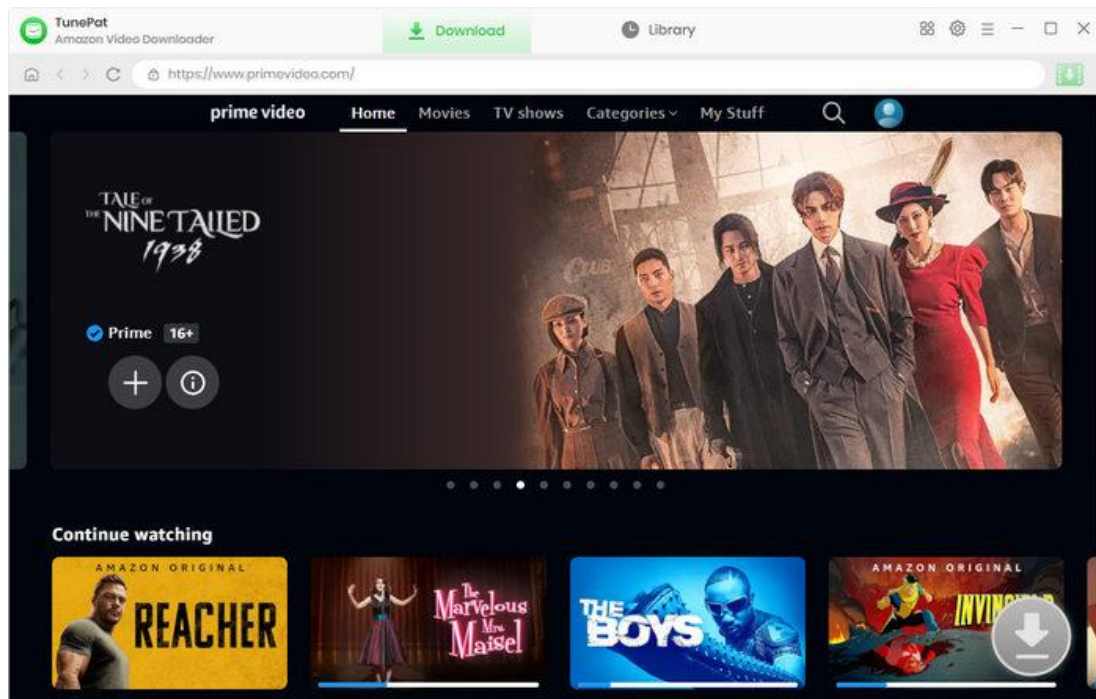

Installation & Interface

Installation

To install this product, please refer to the following steps:

1. Download the latest version of TunePat Amazon Video Downloader through TunePat's Download Center.

2. Double-click the tunepat-amazon-video-downloader.exe file to accomplish a "single-click install".

3. After installing, you can double-click the TunePat icon to launch the program.

Main Interface

Run TunePat Amazon Video Downloader for Windows, you will see the simplified interface as below:
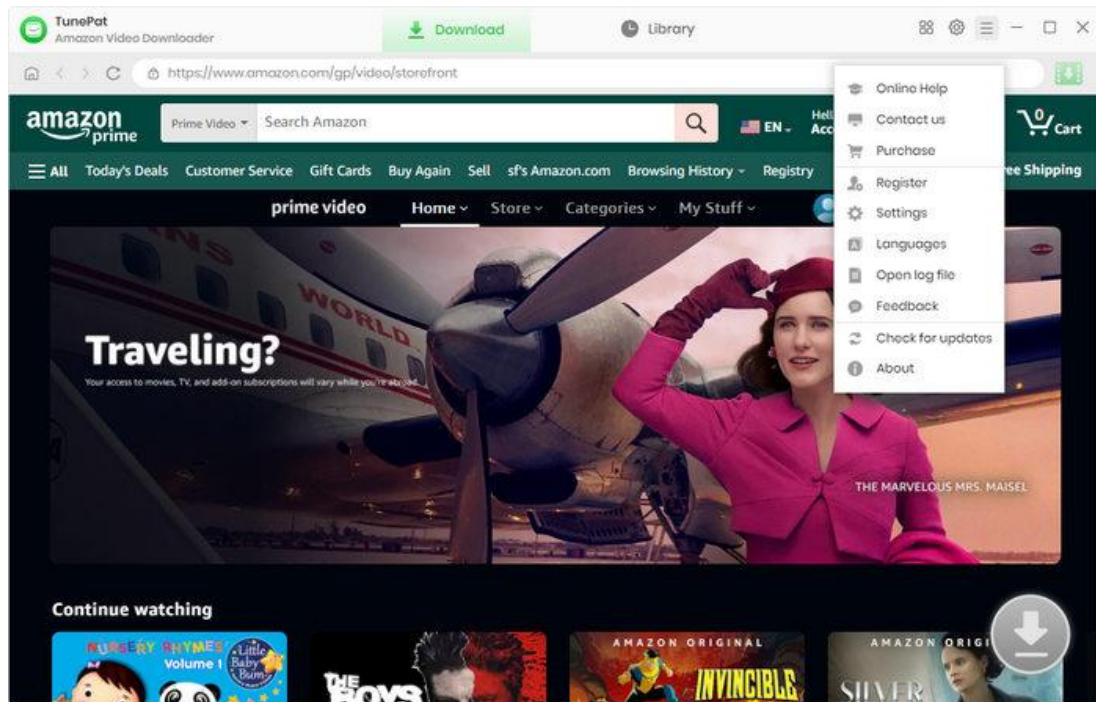

Menu

Click the "**Menu**" button on the upper right corner of the main interface, you will see the drop-down list. Here you can choose to register the program, change the output settings, check for updates when a new version is available, ask for online help when you have any problem with the program, etc.
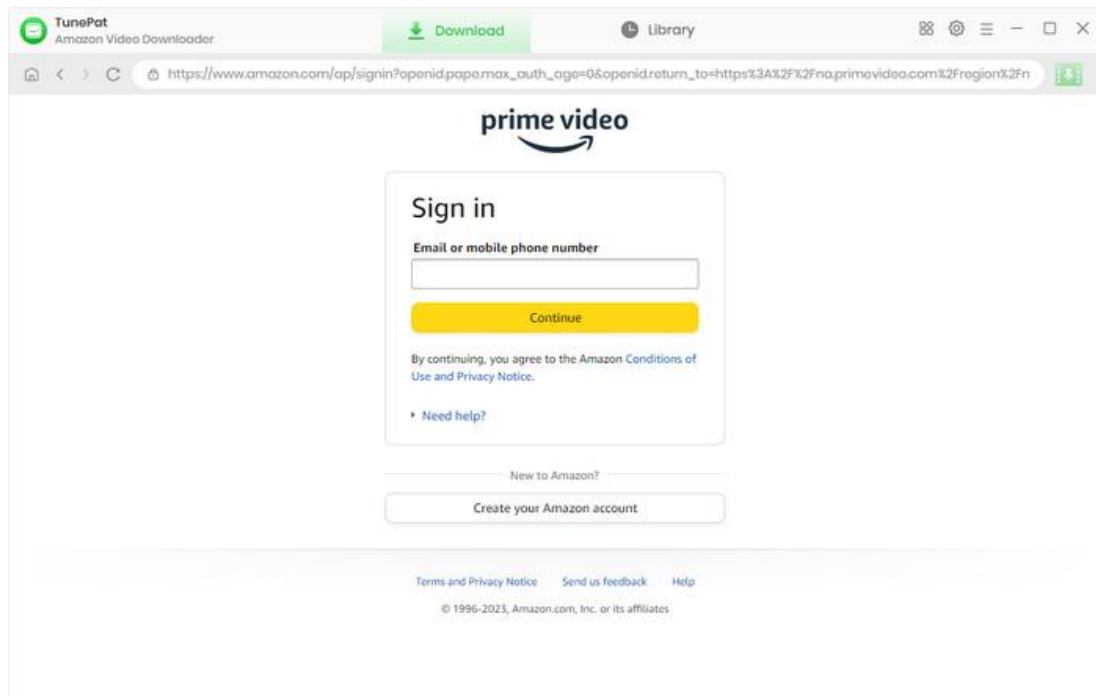

Tutorials

- Log in to Amazon Account

- Customize the Output Settings

- Search for Amazon Video

- Select Advanced Download Settings

- Download Amazon Video

- Check Download History

Log in to Amazon Account

Firstly, you need to log into Amazon with your account. Simply run TunePat Amazon Video Downloader, and choose the website that you are using to access Amazon Prime Video according to your Amazon account. Then the Prime Video web player will appear asking you to log in with your Amazon account.
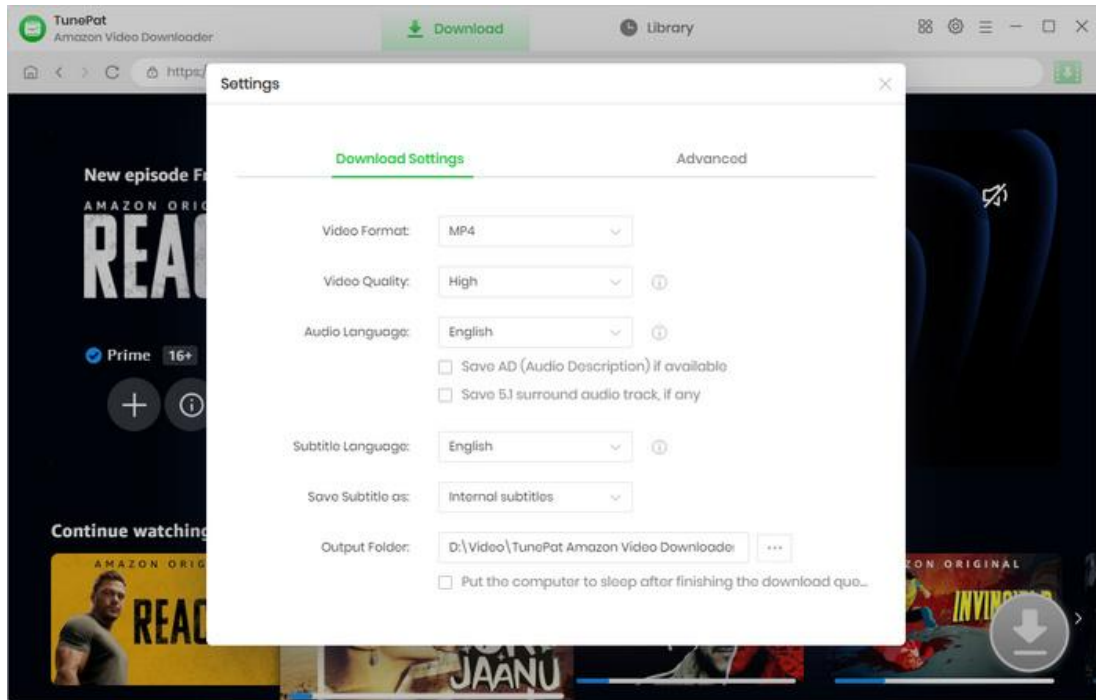

Note: TunePat will not take any information out of your account.

Customize the Output Settings

Click the "**Setting**" button on the upper right corner of the interface to customize the output settings. You can choose the output format (MP4 or MKV), video quality (Low, Medium, High), audio type, the language of the audio track and subtitle, the output path, and more.
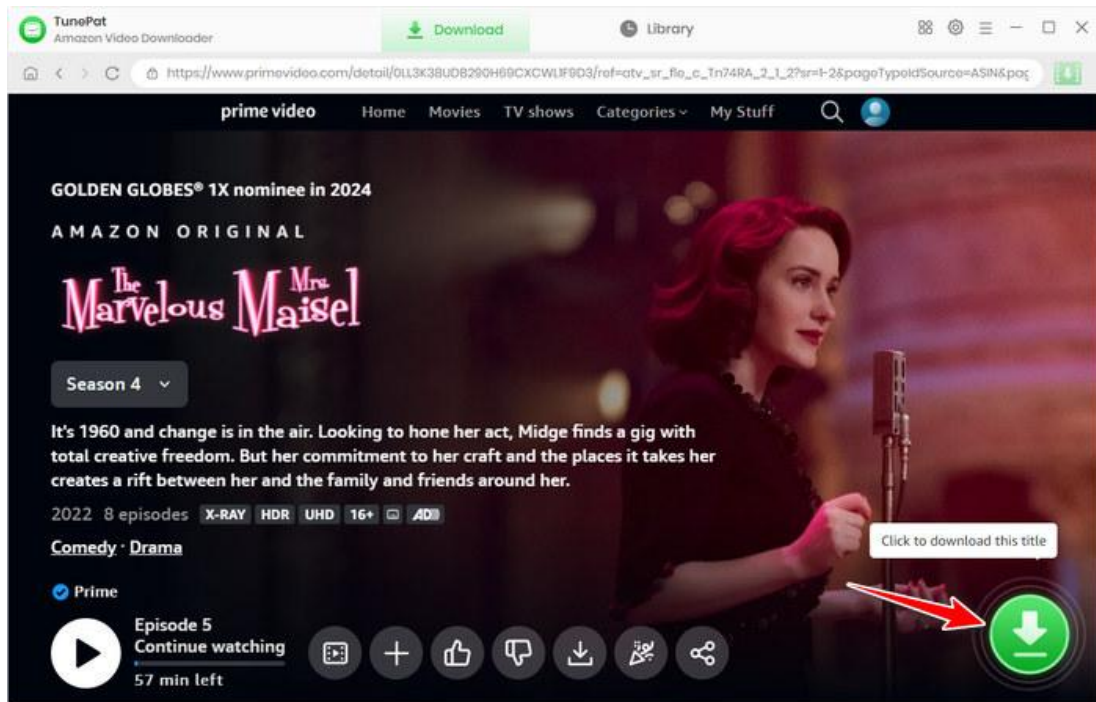

Search for Amazon Video

Search for a video by entering the video's name, or copying & pasting the URL of the video to the search bar of TunePat Amazon Video Downloader. Besides, you can browse the embedded Prime Video web player to locate your target video. Open it, and hit on the green arrow named **"Click to download this title"**.
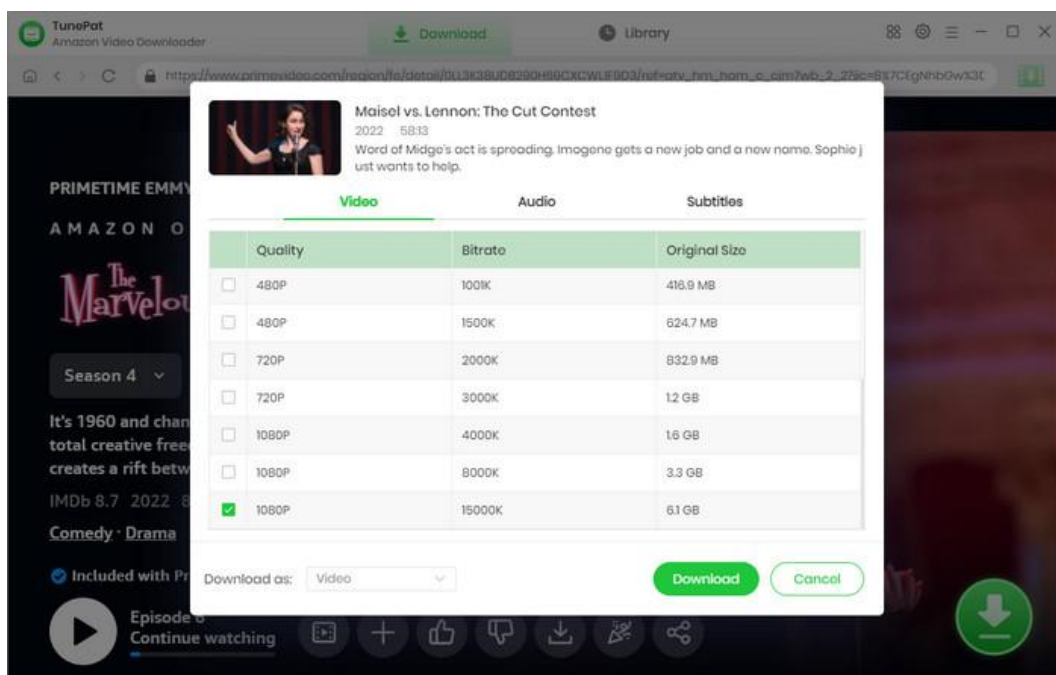

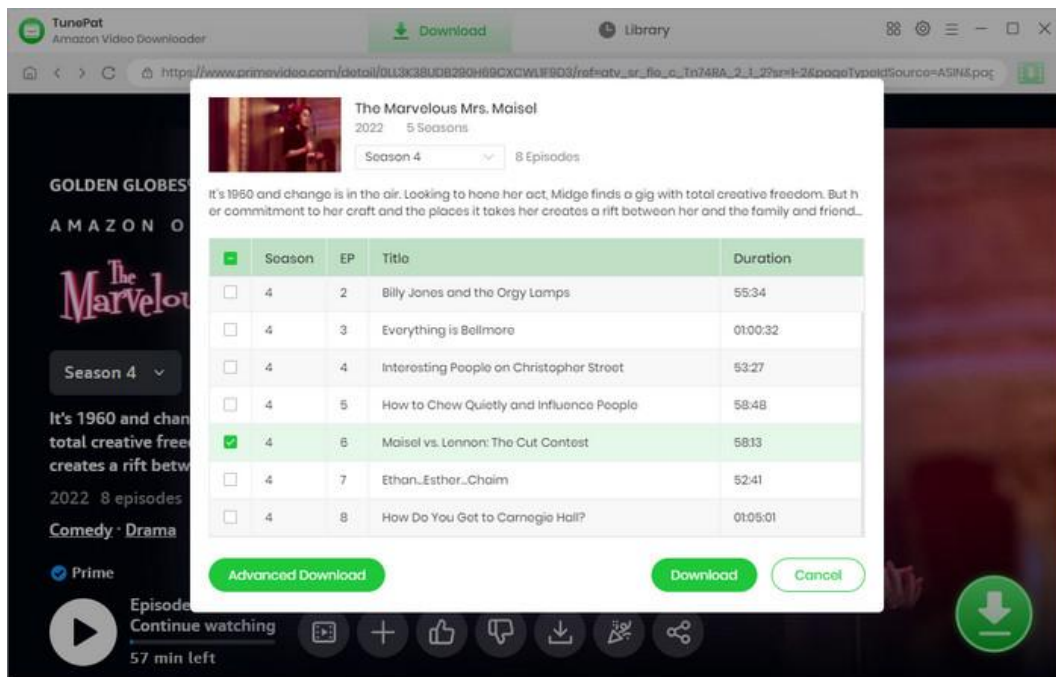

Select Advanced Download Settings

TunePat offers advanced download options that allow you to select specific video quality with different bit rates, as well as the language of audio tracks and subtitles for the chosen videos.

If you are downloading movies, you get the advanced options after clicking to download them. When you are downloading TV shows, you need to choose your target season and episodes from the pop-up window, then click on the **"Advanced Download"** button to the advanced options.
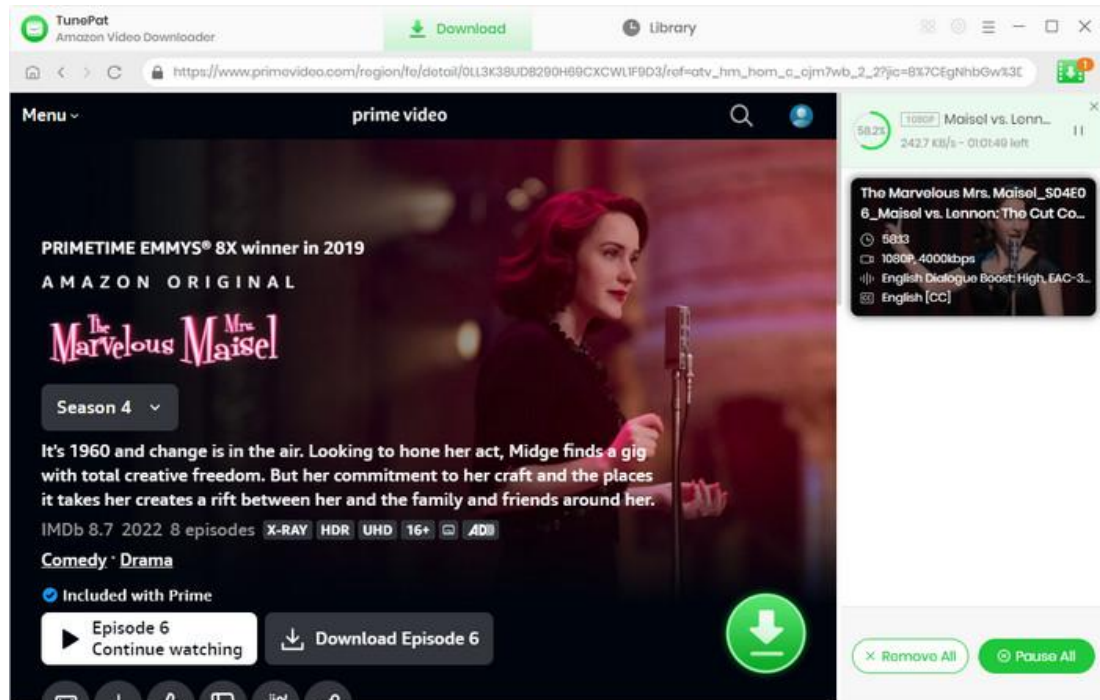

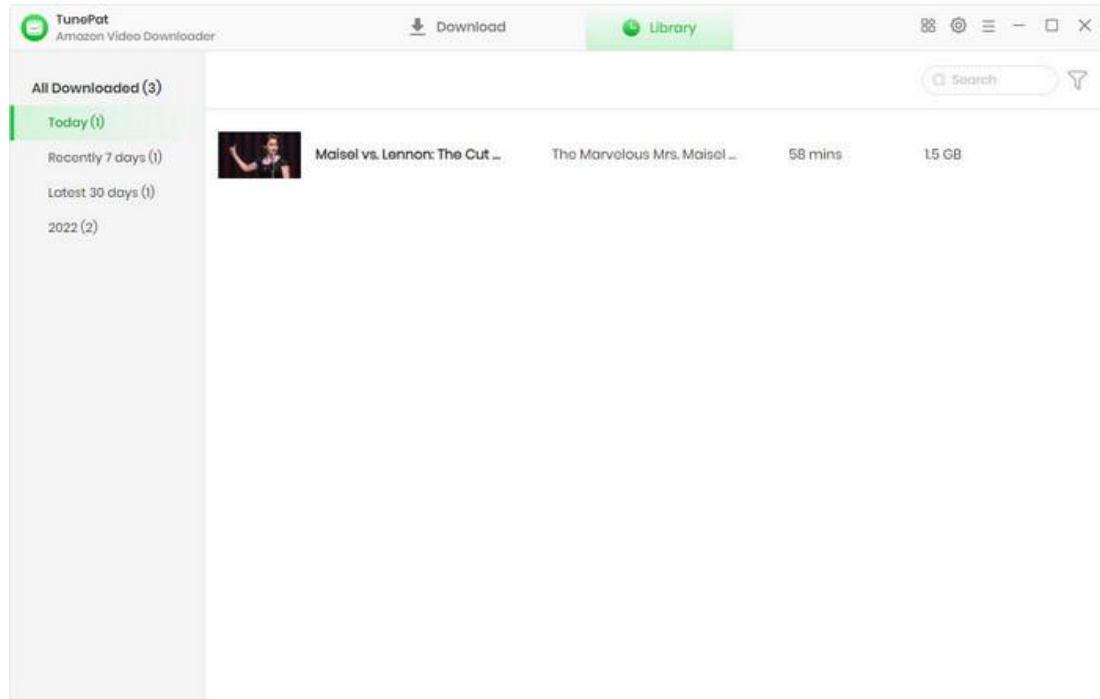

Download Amazon Video

Click on the **"Download"** button to start downloading the videos. If you want to download more videos, repeat the previous adding action. Additionally, you can see the download progress on the right bar.

Check Download History

After downloading, you can check what you have downloaded by clicking the "**Library**" tab. Here you can find the record of all video files.
