Purchase TunePat Hulu Video Downloader for Mac

Tips: To buy a license key for TunePat Hulu Video Downloader for Mac, click Here.

1. Why should I buy TunePat Hulu Video Downloader for Mac?

The trial version of TunePat Hulu Video Downloader has the same features as the registered version, but it enables you to download only the first 5 minutes of each video. After purchasing the product, you will get the Register Email and Register Code to unlock the limitation.

2. What benefits do we have after registration?

- Unlimited use without any function restrictions.

- FREE upgrades to the latest versions of the same product.

- FREE technical support.

Register TunePat Hulu Video Downloader for Mac

Step 1: Run TunePat Hulu Video Downloader on your Mac, click the **"Menu"** button at the upper right corner of the interface, and choose **"Register"** in the drop-down list. Or you can directly click on the key icon to open the registration window.

Step 2: Copy and paste the **Registration Email** and **Code** you received into the registration popup window, then click the **"Register"** button.

Step 3: Once finishing the registration process, the limitations of the trial version will be removed.
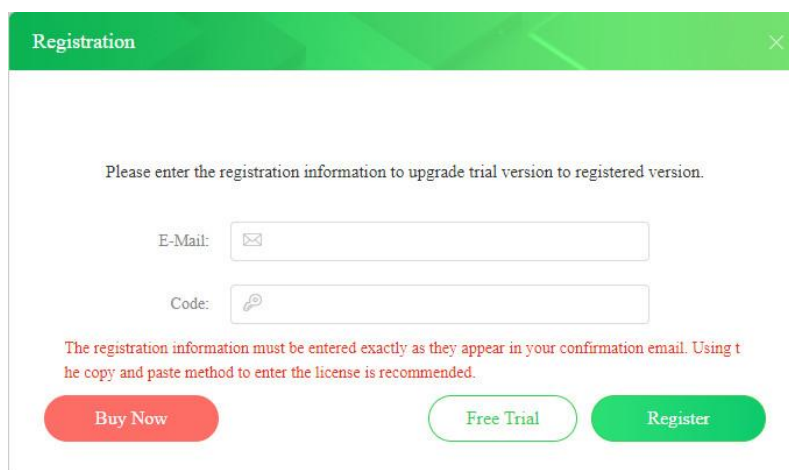

Tips:

1. Make sure your computer is well-connected with the Internet.

2. We suggest you should just copy & paste the Registration information into the popup dialog.

3. Make sure both the Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click "**Buy Now**" to get a license.

4. Please make sure the Registration Email and Registration key you entered are both complete and correct, otherwise an error message will pop up as below:

Installation & Interface

- Menu

Installation

To install this product, please refer to the following steps:

1. Download the latest version of TunePat Hulu Video Downloader through TunePat's Download Center.

2. Double click the installation file to start installing the program on your Mac. Then simply drag the TunePat application's icon to your application folder.

3. Follow the instruction to finish the installation.

Main Interface

Run TunePat Hulu Video Downloader for Mac, you will see the main interface below:

Menu

There is a **"Menu"** button on the upper right corner of the main interface. From here, you can choose to register for the program, go to the general settings window, and check for updates. In addition, you can find the FAQ of the program by clicking on "Online Help".
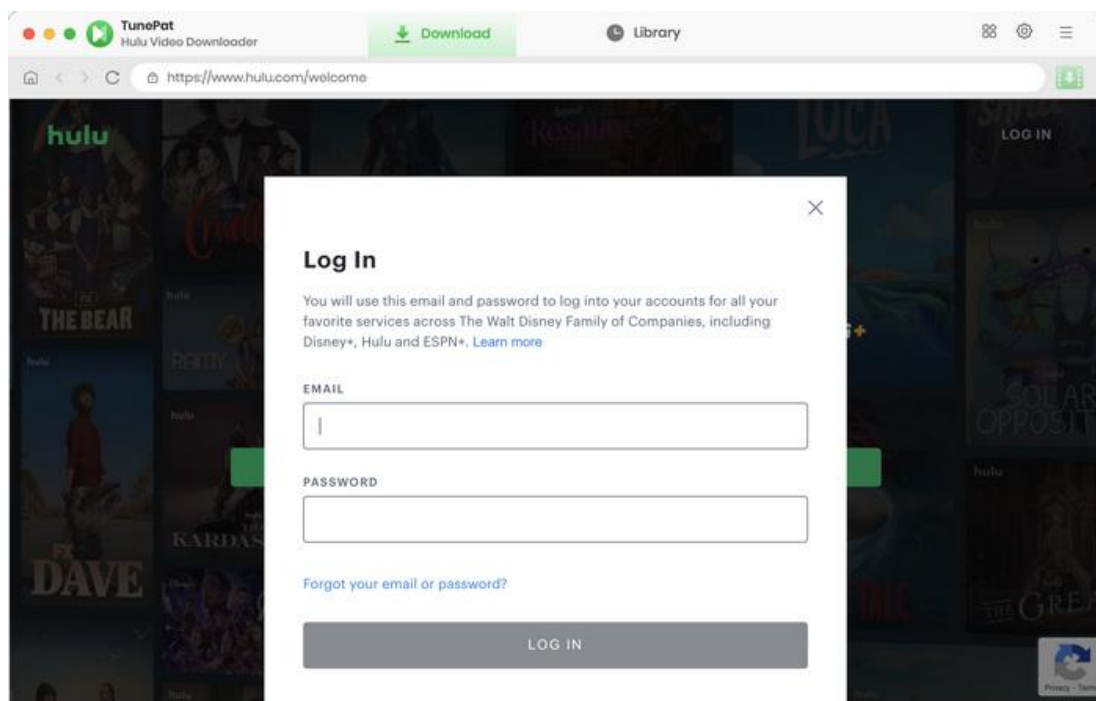

Tutorials

Log into Hulu Account

Firstly, you need to log in to your Hulu account to let TunePat Hulu Video Downloader access the content. After running the program, you will see the built-in Hulu web player. Follow the tips to click on "LOG IN", then you will see the sign-in window. Please enter your email and password accordingly.
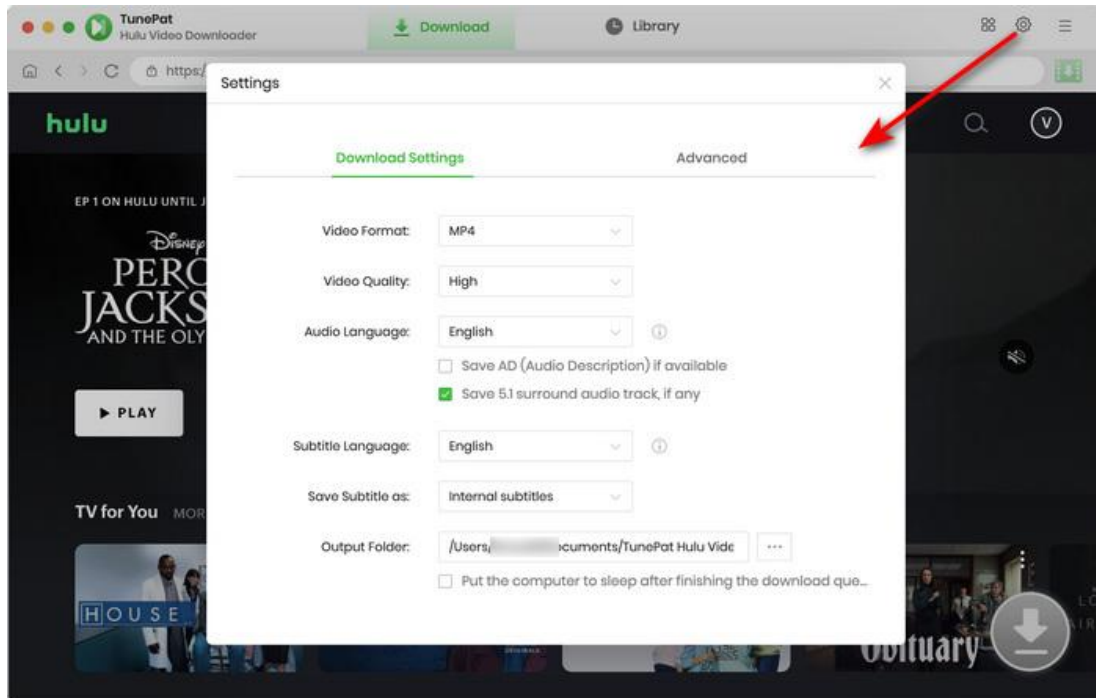

Customize the Output Settings

Click the **"Setting"** button on the upper right corner of the interface to choose the video format, video quality, audio language, subtitle language, output path, etc.
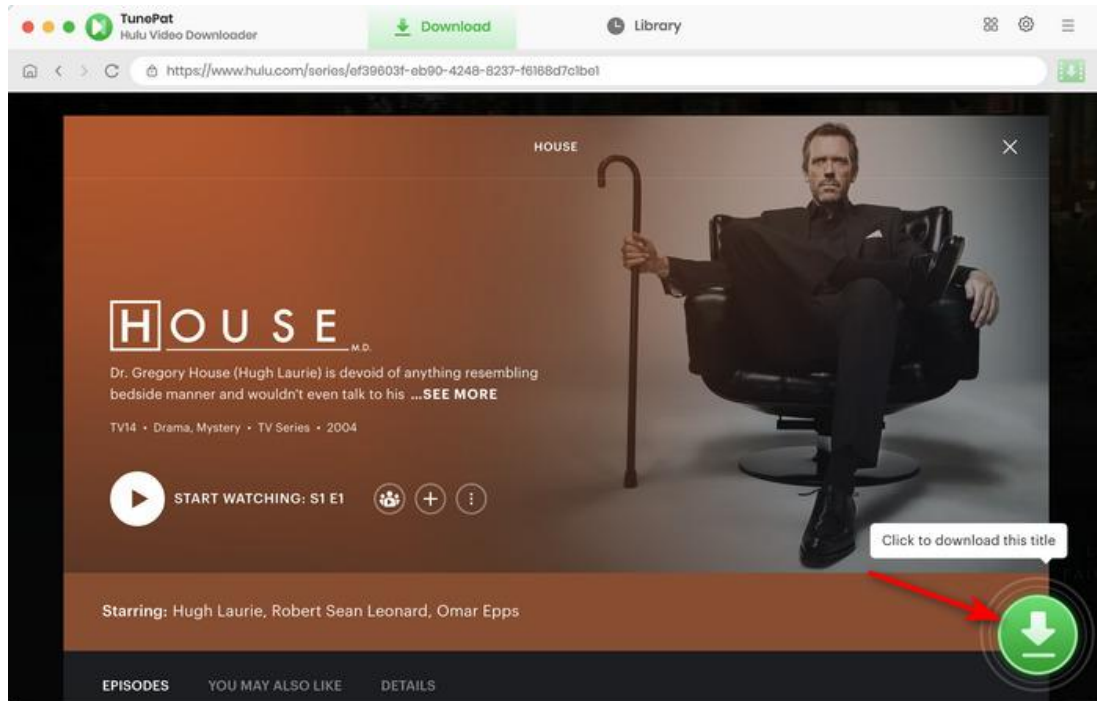

Search for Hulu Videos to Download

Enter the name or keyword of a movie or a TV show, or copy and paste the URL into TunePat's search bar at the top, then press the "Enter" button. TunePat will quickly locate the video. Alternatively, you can find your desired video through the built-in Hulu web player. Open the video description page and hit on the green arrow **"Click to download this title"**.
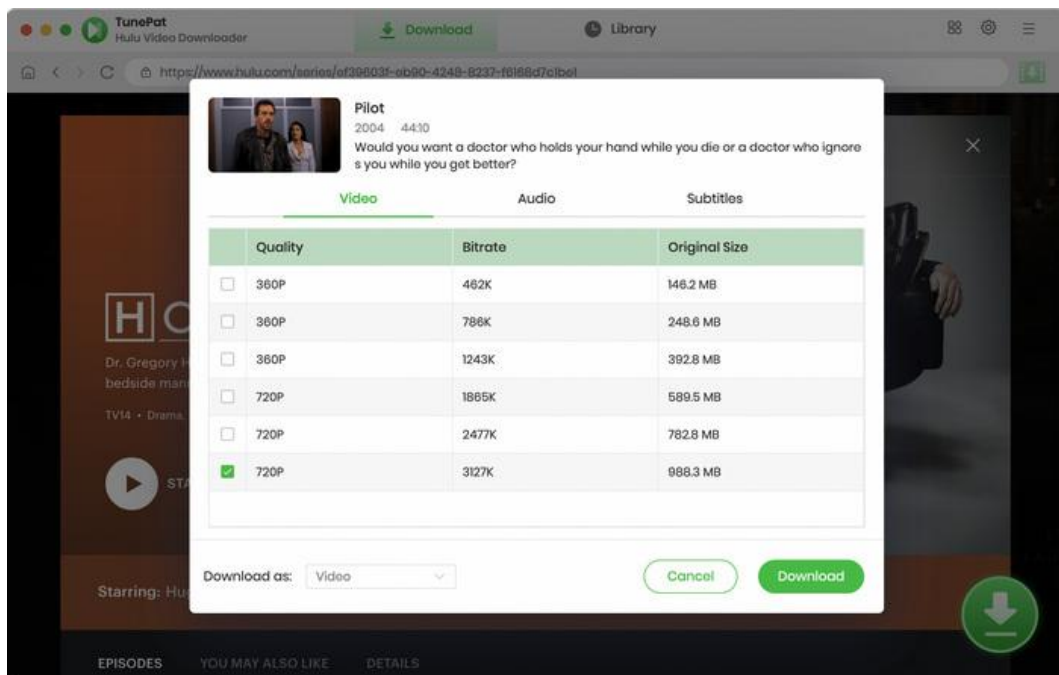

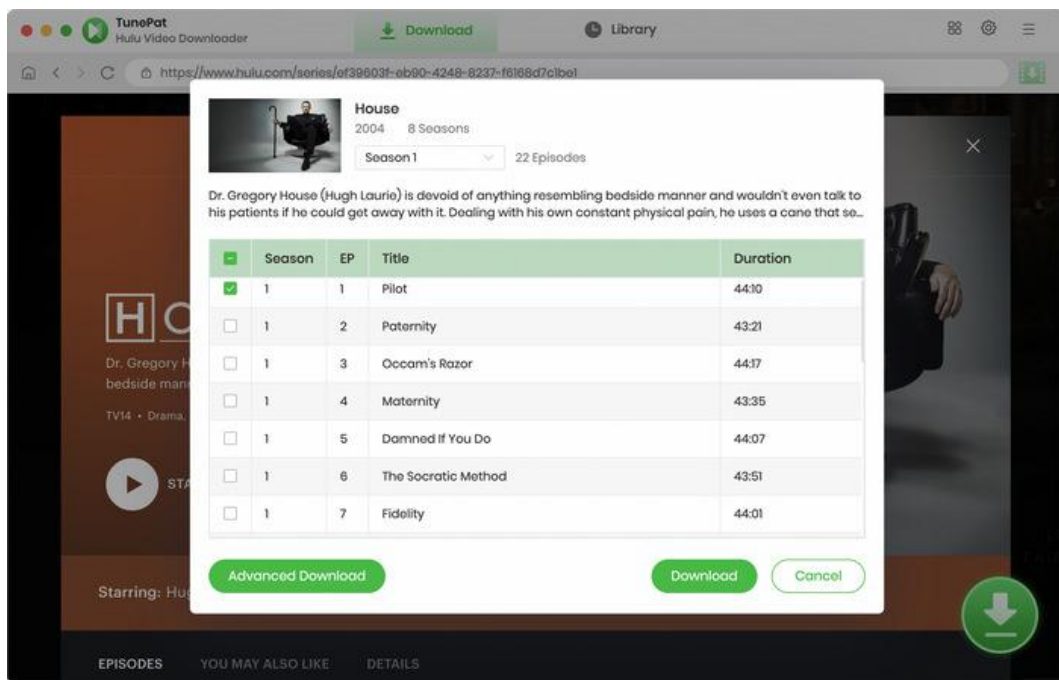

Select Advanced Download Settings

There is an advanced settings window that allows you to select specific video quality, audio track, and subtitles for your selected videos. If you are downloading a movie, you get the options once you click on the arrow. When you are downloading a TV show, you can select your wanted season and episodes first, then click the **"Advanced Download"** button to customize the advanced settings.
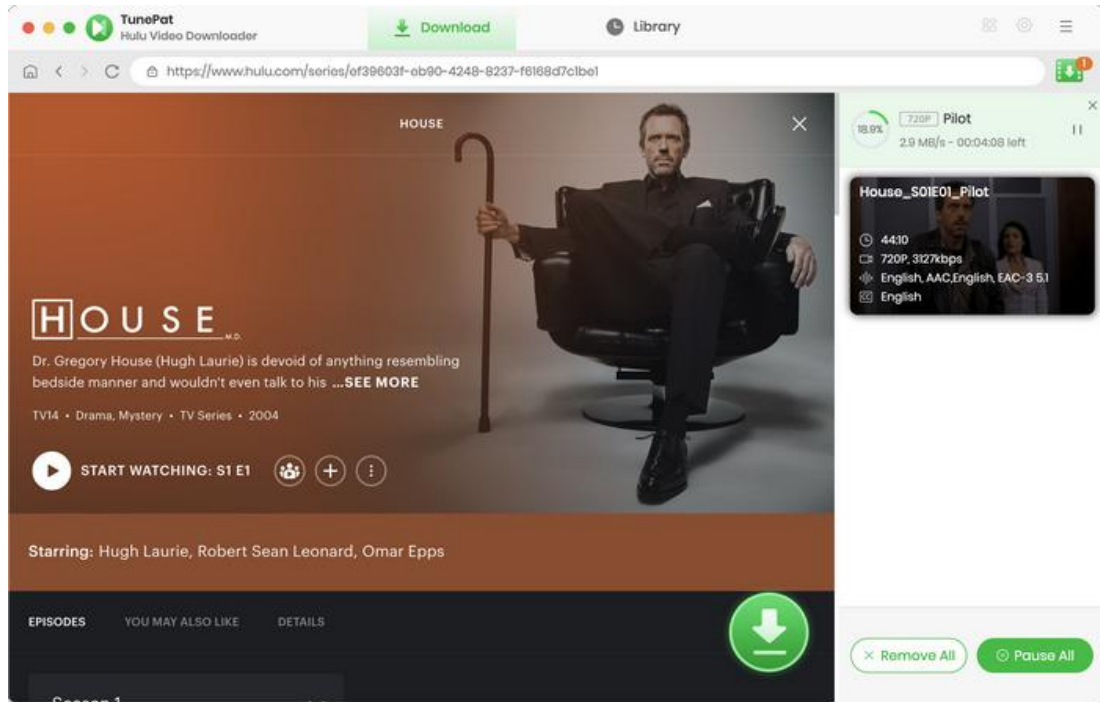

Download Hulu Videos

Click the **"Download"** button and TunePat will start downloading the selected video. The download process will be shown on the right side of the screen.
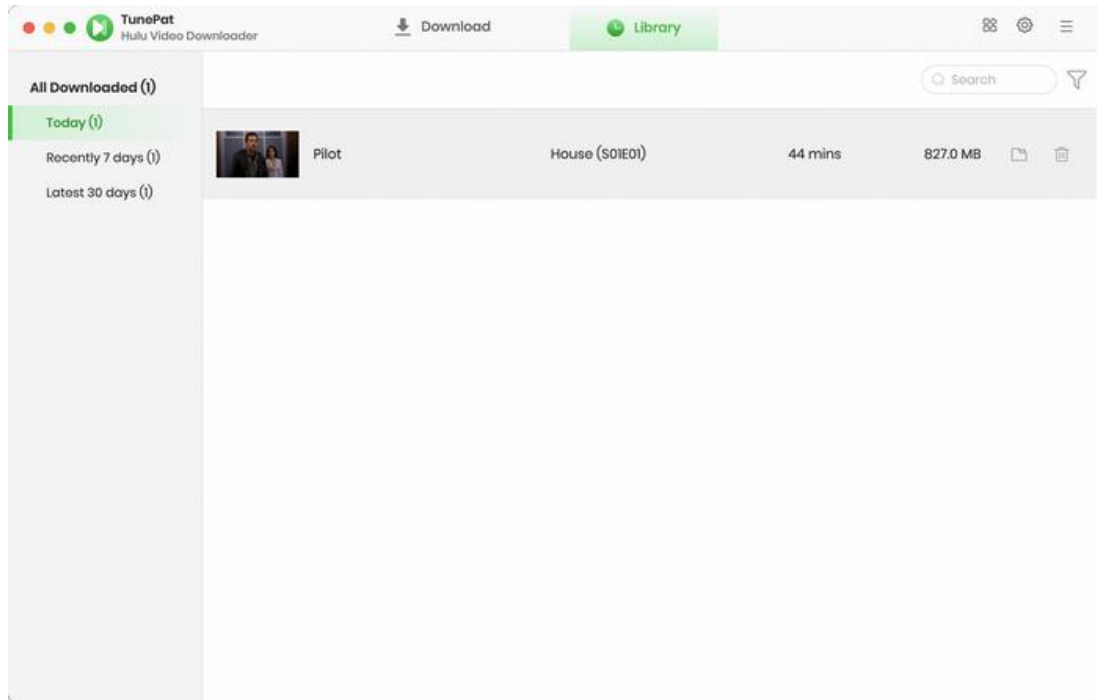

Check Download History

After downloading, go to the "**Library**" tab. Here you can find all the videos that you've downloaded. If you want to open the output folder, simply click on the file icon.
